

Train Arabic Number Flip Book

Materials Needed:

Print off all pages of flip book

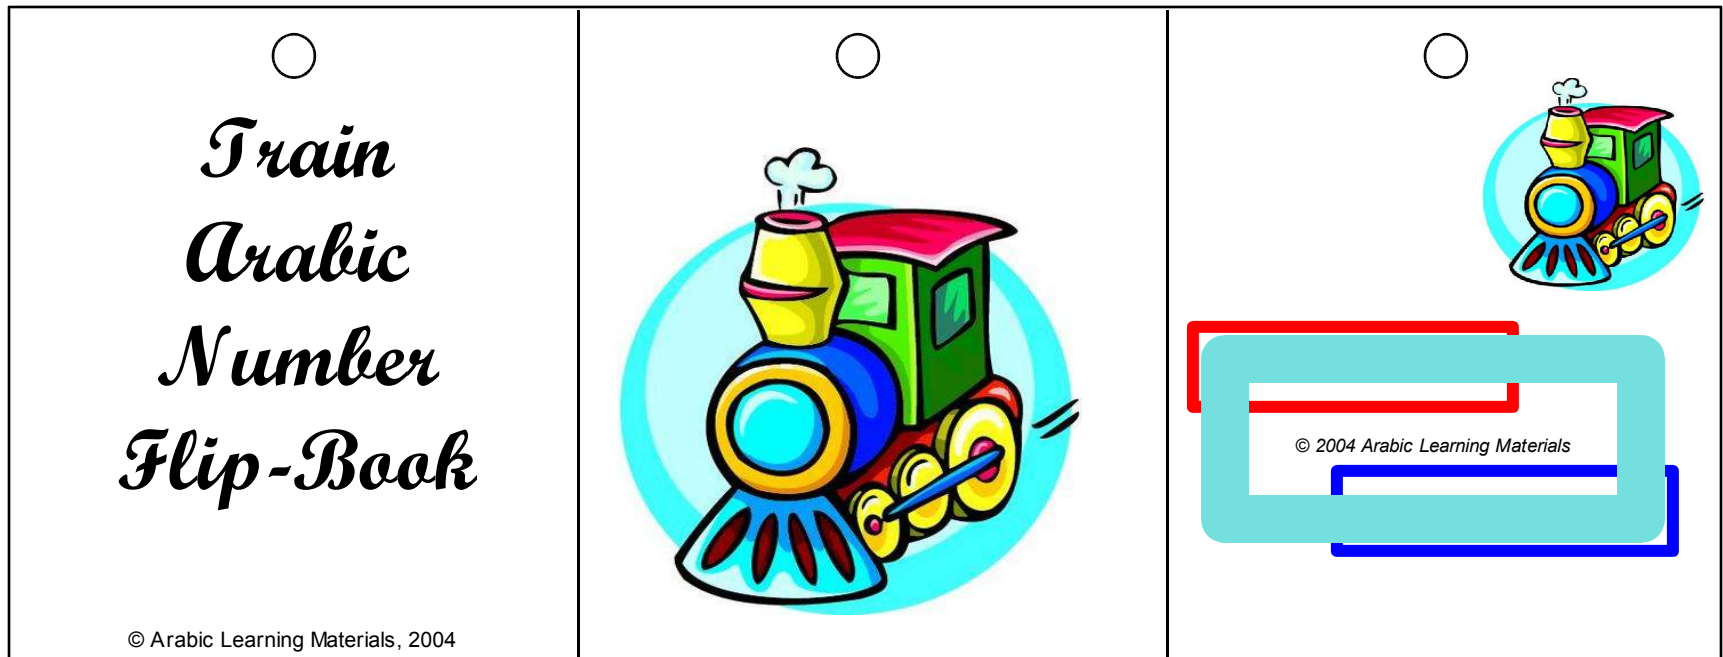

Single Hole punch

Small size loose leaf rings (found at office supply store)

Directions:

- ❖ Print off all pages of flip book – I prefer to print on cardstock. Then laminate.
- ❖ Cut each flip-book page out (not in between the pictures just as one piece – see picture above). As an alternative, you can cut out on the lines each flip-book page (except for the front and the back page). Then you can put the pages in different order. To use the Book, you child must match up the pictures – the written out word for the number, the picture and the number itself.
- ❖ Using single hole punch, punch out the holes as marked on each flip-book page (three per page).
- ❖ Put the pages in order and clip with loose leaf rings.
- ❖ Now you have an Arabic number learning material that you can carry with you!
